**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, there is no antecedent basis for "the mill floor level".

Additionally it is not clear as to how many transmissions are being claimed.

Regarding claim 2, it is not clear as to what the phrase "on both sides" refers to.

In other words on both sides of what structure?

Regarding claim 3, there is no antecedent basis for "the adjustment drives".

Regarding claim 4, there is no antecedent basis for "the receivers".

Regarding claim 6, there is no antecedent basis for "the first shaft", and "the stationary spur gear".

Regarding claim 7, there is no antecedent basis for "the stationary deflector plates".

Regarding claim 8, there is no antecedent basis for "the second shaft".

The remainder of the action considers the claims as best understood.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Malley '231 in view of Talbot '677. O'Malley discloses an edging mill containing all of the claimed elements including, vertical rolls (28) that may be adjusted relative each other (through screws 30) and are connected to a rotary drive (power source for shaft 39) and stationary transmissions (elements 38, 37, 35, 33, 34, 41, etc) through cardan shafts (47). A continuous drive shaft as required by claim 2 is read onto shaft (39), while bevel gears are shown as gearing (37) and (38) and spur gear are shown as gears (34). Adjustment drives are shown as screws (30). Lacking any clear distinguishing features, deflector plates, are read onto plates (67). As best understood, a second shaft is read onto shaft (35). Limitations of claim 8 is shown in figure 1.

Talbot is relied upon to teach that providing a motor (147) below a mill floor level (figure 5) to power transmissions (115, 177 and 111, 118) is known in the art.

***Allowable Subject Matter***

Claim 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***
